PROJECTS

Cockpit Console Centralized Error Management and Service Access Platform. Contributed to the development of a centralized console for error logging and KPI tracking across multiple applications. Integrated with existing Single Sign-On (SSO) infrastructure to provide unified access to backend services through a single login. Facilitated improved client interaction management by consolidating service access into one streamlined interface.

Clix Unified Campaign Engine to connect and engage with customers. Easyrewardz CliX is a platform to target right customers with the right message at the right time. Reach out to customers across channels through personalized multi-wave campaigns.

Flipkart Reverse Coins Exchange Contributed to the development of the SuperCoins Reverse Exchange System, enabling the conversion of third-party partner loyalty points into Flipkart's universal currency, SuperCoins. Designed and implemented integrations to support multiple input channels, including partner web applications, online APIs, vouchers, and batch file uploads. Played a key role in backend service development, API communication, and system scalability improvements.

BLS International provides visa, passport, consular, e-governance, attestation, biometric, e-visa, and retail services.

Jammu Smart City Jammu Govt, platform - Municipal Corporation .

Online Book Store. E-commerce website with Inventory Management feature and Payment Section.
